

STATE COLLEGES FOR NEBRASKA

STRATEGIC PLAN 2025

CHANCELLOR'S MESSAGE

This past year, K-12 and higher education sectors, including the State Colleges, University System, and Community Colleges, partnered with the Legislature to pass LR335 to set an official 70% Attainment Goal for Nebraska. Nebraska was one of only four states that had not established an attainment goal designed to develop a benchmark of the number of citizens requiring a credential above the high school diploma to ensure it remains competitive in the evolving global economy. LR335 set attainment levels at 70% for the 24-35 year-old portion of the workforce by 2030, which will require a multi-pronged approach to:

- 1. Improve high school graduation rates;
- Encourage a more significant percentage of Nebraska high school graduates to pursue educational opportunities after graduation;

- Pursue those opportunities at Nebraska postsecondary institutions;
- Improve retention rates by increasing the number of students advancing beyond the first year of enrollment;
- Increase graduation rates, especially the 4-year rate, so students transition into the workforce more quickly, and, most importantly;
- Ensure that a higher percentage of students obtain employment in Nebraska after graduation.

The NSCS Strategic Plan approved by the Board of Trustees in 2019 has identified outcomes and performance metrics that directly align with these challenges above. The State Colleges have continued to partner with the Governor and the Legislature to grow the Career Scholarship program by providing meaningful financial incentives

Published: January, 2023

for students to pursue High Demand, High Wage, and High Skill (H3) degree programs that align most closely with the workforce needs of the State. Each College has developed unique programs that seek to improve enrollment in these programs. Chadron State College developed the Rural Business Leadership Initiative, targeting workforce shortages in Ag Business-related industries. Peru State College has targeted funds toward the Future Teacher Scholarship to align with its mission as the first public Normal School in Nebraska. Wayne State College developed the Growing Together program based in Norfolk with the Aksarben Foundation to create a living-learning model for students to complete a year-long Cooperative Education experience. Each of these initiatives allow the Colleges to engage in meaningful work experiences with Businesses and Industries in the area.

The American Recovery & Reinvestment

Act (ARPA) funding provided to the Department of Economic Development to expand the InternNE program will serve as a valuable resource for encouraging Nebraska businesses to grow their internship opportunities and align closely with efforts underway across each of these programs. Lastly, the Corrections Leadership Program at Peru continues to serve as a one-of-a-kind model for training the future Corrections workforce in Nebraska. This unique partnership between Peru State College and the Department of Corrections provides students with internship opportunities beginning in the students' sophomore year where they work part-time at Tecumseh State Penitentiary with a goal of future employment in an area that has critical workforce shortages. Due to the success of programs like these, the placement of State College students continues to be among the highest in the region, especially

for the Nebraska residents we attract to the Colleges. This past year more than 83% of the graduates from Chadron, Peru, and Wayne State were employed in Nebraska one year after graduation. This reflects data matched with the Nebraska Department of Labor which provides the most accurate placement methodology for tracking this vital metric.

Our four major outcomes continue to make significant improvements in Student Success and Completion, ensuring Academic and Institutional Quality for our students, meeting Workforce and Economic Development needs for the State, and achieving our core mission of Access and Affordability (especially for the high number of first-generation and pell-eligible students we serve). Through the ongoing support from the Legislature, the State Colleges were able to freeze tuition for the past two years, with a four-year average increase

of just 1.25%. Along with this strategy, the System's focus on evolving the Colleges into institutions that focus students on applied learning that leads directly to a career in Nebraska has contributed to our ongoing enrollment growth and graduate production. Considering the enrollment challenges adversely impacting higher education systems across the country, the State Colleges have stood out by increasing enrollments over the past four years by 8%.

In closing, Chadron, Peru, and Wayne State Colleges continue to be uniquely positioned to expand their efforts to meet Nebraska's educational and workforce needs, especially in rural Nebraska. I look forward to assisting in these efforts as we strive to meet the benchmarks set for each of the twenty performance metrics used to assess our successes in achieving our four 2025 Strategic Plan outcomes.

OVERVIEW

The goal in developing the 2025 Strategic Plan for the Nebraska State College System was to answer one important question, "What outcomes do stakeholders in Nebraska expect for the resources allocated to Chadron, Peru, and Wayne State Colleges?" Faculty, staff, students, administrative leadership, and alumni comprising a 36 member task force spent six months developing a strategic planning framework in response to this question. Throughout these conversations, four outcomes were refined and further operationalized to ensure alignment with the mission and vision at each College. These outcomes include:

 Student Success & **Completion** – Ensure all students receive necessary support and resources to enable successful progression and on-time degree completion.

- Institutional & Academic **Quality** – Deliver an array of high-quality academic programs and curricular activities that successfully prepare students for the range of careers they will experience after graduation.
- Workforce & Economic **Impact** – Expand capacity for the Colleges to produce graduates who meet the workforce needs for Nebraska and to strengthen the Colleges' role as change agents for the rural communities they serve.

Access & Affordability –

Preserve the open-access mission providing all students with an equitable opportunity to pursue affordable undergraduate and graduate degree options in Nebraska.

A set of twenty performance metrics are aligned to each of the four primary outcomes designed to drive College and System initiatives. As these performance metrics were refined, trends were evaluated to assess the current trajectory during the past decade. For several metrics, positive trends were reflected, which were used to set specific benchmarks for the System by 2025. For other metrics, important gap groups were identified to encourage critical growth in serving underrepresented student

populations over the next six years. When undesirable trajectories emerged, performance goals were identified to change course and put the System on a path of improvement.

A common concern of strategic planning is once the process has concluded, the outcomes of the effort are soon forgotten. The approach outlined above was taken to avoid this critical misstep. This report serves as the third installment of the 2025 Strategic Plan report where progress was made on twelve (60%) of the performance metrics this past year. The green, yellow, and red indicators on the scorecard are intended to provide direction for where additional attention will need to be devoted this coming year to address the benchmarks.

GOAL:

Student Success and Completion

Ensure all students receive the necessary support and resources to enable successful progression and on-time degree completion

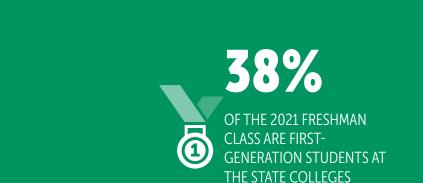

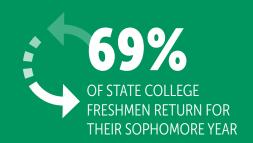

An essential function for any postsecondary institution is to ensure its students can successfully navigate to degree completion. The State Colleges operationalized Student Success & Completion to provide timely progression for all students in the System. Six performance metrics were identified to measure the Colleges' success through 2025. Student first-year retention is an essential preliminary indicator that ensures students successfully overcome the many hurdles/challenges they may face during their freshman year. Additionally, increasing the overall graduation rate for students signifies the State Colleges are fulfilling their promise to help students achieve degree attainment to enter the workforce in their chosen

careers. The State Colleges also seek to close the sizable retention and degree attainment gap that exists for many Pell Eligible students who are served each year. Finally, meeting Nebraska's workforce needs requires an increase in graduate production to meet an everexpanding attainment goal necessary to remain economically competitive with other states and countries around

the world. The Colleges seek to meet these workforce needs by growing their traditional student populations and setting goals for expanding the number of transfer students who earn their degrees from each of the three State Colleges.

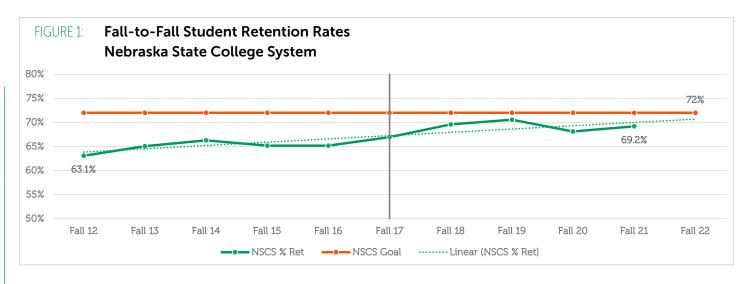

Student Retention Rates¹

INDICATOR 1

The percentage of first-time, full-time students retained at the State Colleges has remained relatively consistent at just above 65% over the past decade. Despite a slight decrease in retention rate of the Fall 2020 cohort, a 1% increase in the Fall 2021 retention rate resulted in an overall retention rate of 69%.

A central mission of the State Colleges is to provide degree program offerings for a traditional age freshman in the region. A large percentage of NSCS freshmen students entering each year identify as first-generation students, who face significant barriers as they transition into their post-secondary experience. Providing student support services to assist with this transition is vital to ensure a successful first-year experience

and lay the foundation for future on-time degree completion. The State Colleges engage in a variety of initiatives designed to increase retention rates for all students. These include transitional course support, intrusive advising, and services that increase self-efficacy and resilience. These activities are critical in helping students overcome the range of personal and academic challenges they face on their pathways toward earning

their degrees. The goal of reaching 72% by 2025 was established by evaluating data available through The Consortium for Student Retention and Data Exchange (CSRDE)² which has set this benchmark for comparing the three State Colleges against respective peers with similar student characteristics

- 1.1% Increase (1-Year Δ)
- 2.2% Increase (Baseline Δ)

CHADRON STATE COLLEGE

Focus on Retention Efforts

Chadron State College continues to take strategic steps to improve student retention resulting in an overall first-year retention rate of 72% for the Fall 2021 term, a 4% increase from the previous year. CSC students benefit from a Peer Mentorship Program, which was established in 2019, and the Transitional Studies Program and TRIO continue to impact at-risk students. The College uses a relational and intrusive advising model for students, as well as hosts a training program for faculty. Acknowledging the faculty's vital role in retention efforts, annual evaluations have included a goal related to retention or recruitment.

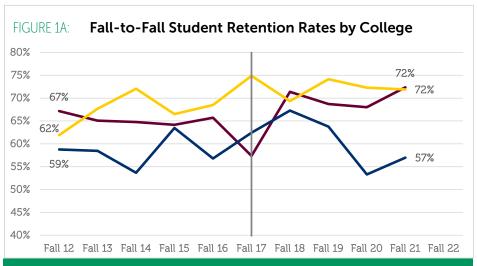

College Level Data

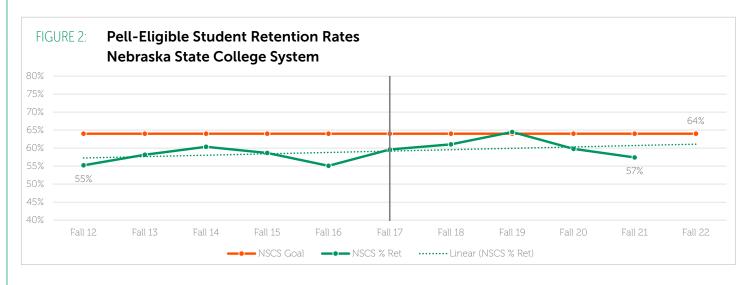

Student Success & Completion: Student Retention Rates TABLE 1:

	Cohort	CSC	PSC	WSC	System
	Fall 12	67%	59%	62%	63.1%
	Fall 13	65%	58%	68%	65.1%
	Fall 14	65%	54%	72%	66.3%
	Fall 15	64%	63%	67%	65.2%
	Fall 16	66%	57%	69%	65.2%
Baseline	Fall 17	57%	62%	75%	66.9%
	Fall 18	71%	67%	69%	69.6%
	Fall 19	69%	64%	74%	70.6%
	Fall 20	68%	53%	72%	68.1%
	Fall 21	72%	57%	72%	69.2%

Pell-Eligible Student Retention Rates

INDICATOR 2

The overall number of Pell-Eligible students retained in the State College System has increased gradually over the past decade, achieving one of its highest retention rates for the Fall 2019 cohort. Over the past two years, the System has experienced a 7% decline, in great part due to the impact of the pandemic. While the success achieved prior to the pandemic helped the System close the gap and hit the desired benchmark set by the Strategic Plan Task Force, greater emphasis will be necessary to return to these levels and effectively eliminate the gap that exists for these students and the general student population.

A central goal of the Nebraska State College System is to provide an affordable and open access high education option for Nebraska students, indicating the three Colleges will be the institutions of choice for a higher percentage of low-income and first-generation students. Many of these students are likely to be Pell-Eligible, which requires additional financial and

support services to ensure these students can successfully navigate the first-year experience at their institution of choice. Eliminating the existing gap in Pell-Eligible student retention has been identified as an important metric to ensure future retention rates for this specific student population to mirror the traditional student population across the System. The goal through 2025

is to make progress toward slowly eliminating this gap for this subset of students and increase the retention rate to 64% to bring it closer in line with the current rate for first-time, full-time cohorts that attend the State Colleges.

- 3% Decrease (1-Year Δ)
- 3% Decrease (Baseline Δ)

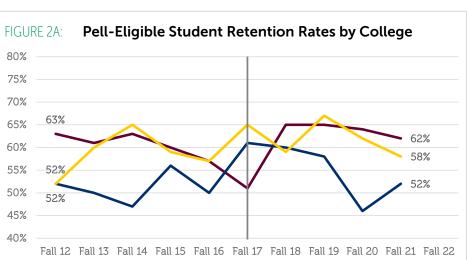

NEBRASKA STATE COLLEGES

Tuition Guarantee Provides Financial Relief to Students

Building on the Colleges' long-standing history of providing an accessible and affordable college education to Nebraska students, the Tuition Guarantee plays a vital role in supporting the workforce needs, not only in the rural areas the Colleges serve but across Nebraska. The Nebraska State College Tuition Guarantee ensures that Pell-qualified Nebraska students can attend Chadron State, Peru State, or Wayne State College tuitionfree and applies to returning, transfer, and new undergraduate full-time students at the Colleges.

The Guarantee opens doors to students who aspire to earn a four-year college degree but are concerned about taking on significant debt The program eliminates that barrier by providing access to a tuition-free education. This straightforward approach will offer students, especially first-generation students, a clear path to high-demand careers in Nebraska.

College Level Data

CSC PSC WSC Peers

	Fall 18	65%	60%	59%	61%
	Fall 19	65%	58%	67%	64%
	Fall 20	64%	46%	62%	60%
	Fall 21	62%	52%	58%	57%

Undergraduate Degree Completion Rates (6 Year)

INDICATOR 3

The State Colleges had established overall six-year graduation rates over the past decade at a rate of roughly 45% for first-time, full-time undergraduate students finishing their degree within the 150% estimates used by the National Center for Educational Statistics (NCES). Despite the decrease that occurred last year for the Fall 2015 cohort, the Fall 16 cohort's completion rate rebounded .6% to 44.9%. Additional attention will be needed by the System to continue this momentum toward the established 50% goal.

Completion rates serve as a cumulative measure of an institution's entire academic enterprise, as activities related to affordability, admission practices, available grant/aid, curriculum, academic, and student support services ultimately affect cumulative completion rates. Additionally, though a six-year graduation rate of under 50% may not seem significant, it is important to note the current rate for the Nebraska State College System is strong

considering the open-access mission across the Colleges. All three State Colleges report a rate either near or significantly above the rates maintained by other open admission peers across the country.³ Despite this comparison against peer institutions, the Nebraska State College System seeks to improve upon the overall graduation rate by five percent through 2025, with a goal of achieving a 50% completion rate for the undergraduate cohort that entered each College during

the Fall 2018 term. The pandemic has certainly interfered in the Colleges' efforts to keep students on pace to complete their degree as initially intended. The percentage of students who did not complete a degree this past year will continue to have an opportunity to earn their degree, albeit outside the six-year reporting window.

- 0.6% Increase (1-Year Δ)
- 3.3% Increase (Baseline Δ)

WAYNE STATE COLLEGE

Improving Retention and Graduation Rate

Wayne State continues to leverage available resources to improve retention and graduation rates. The four-year graduation rate has improved by 4 percent, and the retention rate for students moving from their first to second year has hit 72 percent. One of the most significant developments for student success and completion at WSC is the \$2.125-million grant the College received from the U.S. Department of Education through the Title III Strengthening Institutions program in 2021. The five-year grant will provide WSC with the resources to substantially reduce student performance gaps, increase the percentage of students who return to continue their education in the following year, and increase graduation rates. WSC's focus on student success, affordability, and maintaining a close-knit, diverse community has made Wayne State the institution of choice for many of Nebraska's first-generation, low-income, and rural students. Changing demographics projected for the State point to the need to prepare for changes in the student body. WSC will use the funds to support comprehensive academic success plans inside and outside the classroom.

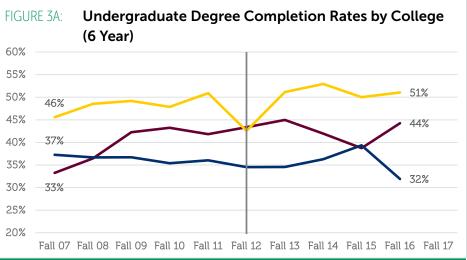

College Level Data

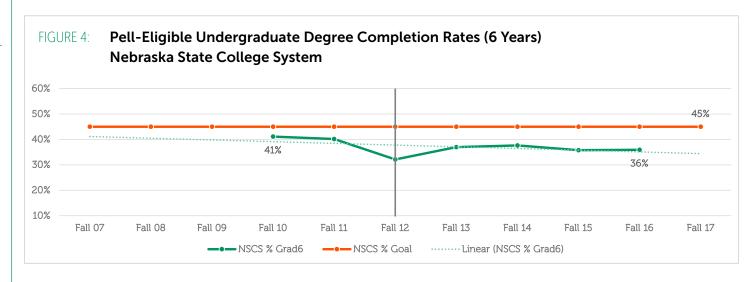

Undergraduate Degree Completion Rates (6 Year) TABLE 3:

	Cohort	CSC	PSC	WSC	System

	Fall 16	44%	32%	51%	45%

Pell-Eligible Undergraduate Degree Completion Rates (6 Year)

INDICATOR 4

Similar to the goals outlined for Indicator 2 for improving retention rates for Pell-Eligible students, the State Colleges seek to improve upon the completion rates for this critical gap group of undergraduate students. Completion rates for Pell-Eligible students have only been maintained since the 2010 graduating cohort at all three Colleges, and trends demonstrate a decline in the success of these students and a sizable gap growing between Pell-Eligible and traditional first-time, full-time cohorts. The most recent System average remained steady at 36% for the second year, which is an increase of 4% when compared against the baseline set for the Fall 2012 cohort.

Retention rates for Pell-Eligible students reflected roughly a 6-7% gap between Pell-Eligible and all students in the cohort. This divide continues to exist when evaluating graduation trends at the six-year mark. Similar to the approach outlined for Pell-eligible student retention, the goal is to slowly eliminate this gap through 2025 by increasing the six-year graduation

rate for this group of students to 45%. Failure to complete a degree is detrimental for any student, considering the potential financial investment in credit hours that have not resulted in a credential. This is even more critical for low-income students who have the fewest resources to contribute toward educational costs, despite the resources made available through

Federal Pell funding. Providing additional grant/aid, targeted student and academic support services, and delayed administrative withdrawals are all strategies that the Colleges can use to improve graduation rates for this population of students.

- 0% Decrease (1-Year Δ)
- 4% Increase (Baseline △)

CHADRON STATE COLLEGE

Providing Financial Support for Pell-Eligible Students

Chadron State College continues to reduce the financial stress on families who are unable to assist with paying for college. Chadron State has shifted to front-loading of supplemental gift aid to first- and second-year Pell-Eligible students to help reduce their need to borrow. Chadron State began offering its need-based Premier Scholarship in Fall 2022 to students who have unmet financial needs. The College has also implemented Eagles 360, an online platform that assists faculty and staff in identifying at-risk students; connects students with support initiatives; and improves student care, persistence, and retention.

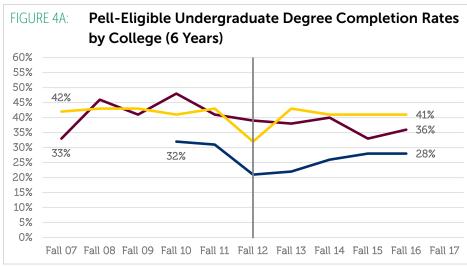

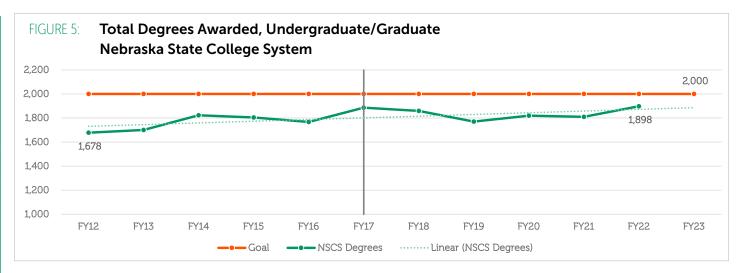

TABLE 4: **Pell-Eligible Undergraduate Degree Completion Rates** (6 Years)

	Cohort	CSC	PSC	WSC	System
	Fall 07	33%		42%	
	Fall 08	46%		43%	
	Fall 09	41%		43%

Baseline	Fall 12	39%	21%	32%	32%
	Fall 13	38%	22%	43%	37%
	Fall 14	40%	26%	41%	38%
	Fall 15	33%	28%	41%	36%
	Fall 16	36%	28%	41%	36%

Total Degrees Awarded, Undergraduate/ Graduate

INDICATOR 5

The total number of undergraduate and graduate degrees awarded in the Nebraska State College System has averaged around 1,750 students each year during the past decade, with the baseline set at 1,859 for FY18. Graduate production fell slightly in FY19, increased in FY20, and held in FY21. The system is currently 102 degrees away from meeting the annual award production goal of 2,000 degrees by 2025.

Considering the need to increase educational attainment rates in Nebraska, a significant need to increase overall graduate production exists to achieve a 70% attainment goal. Degrees awarded at the three State Colleges are often a direct function of enrollment. However, despite slight or moderate declines in enrollment over the past decade, the Nebraska State College System has gradually increased the total number of degrees awarded. In FY09 through FY12, the total number

of degrees awarded ranged between 1,855 and 1,678 per year, yet FY12 through FY17 has resulted in steady growth to more than 1,886 degrees awarded per year, which was a System high across undergraduate and graduate programs. While the past few years have resulted in lower numbers than the established baseline, the overall number of 1898 degrees awarded for FY22 places the system at only 102 degrees away from meeting the annual graduate production goal of 2,000 degrees by

2025 to assist the State in meeting its degree attainment outcomes and increasing the number of Nebraska residents who have the necessary credentials to meet the State's future workforce and economic development objectives.

- Increase of 88 degrees awarded (1-Year Δ)
- Increase of 39 degrees awarded
 (Baseline Δ)

WAYNE STATE COLLEGE

Student-Success Focus Yields Results

Wayne State's strong partnerships and advisory relationships with industry and business leaders enable the College to stay attuned to Nebraska's workforce needs and developing career demands. Investing in these relationships has yielded an expanded portfolio of graduate programs and undergraduate degree offerings to meet external demand and increase the total degrees awarded. WSC remains focused on assisting students in overcoming academic challenges through the Academic Advising Center. Software applications such as Pharos360 have equipped the College with enhanced processes to coordinate efforts across academic units and identify students who need assistance earlier than ever before. Pharos360's ability to present academic advisors with real-time grade information and attendance data makes early and personal interventions possible, which are key to ensuring student success. Wayne State's efforts have resulted in a campus culture more highly focused on helping students achieve their dreams of earning a college degree.

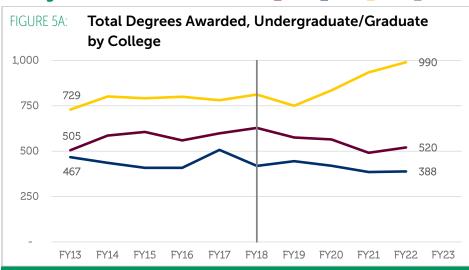

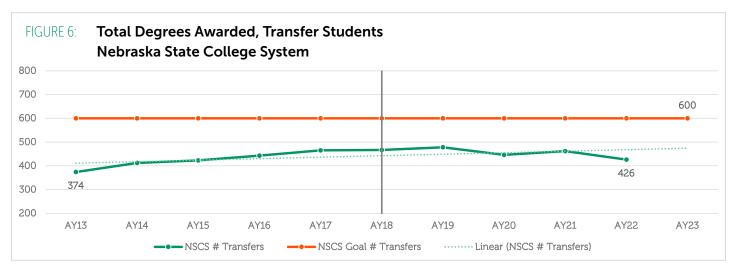

Total Degrees Awarded, Undergraduate/Graduate TABLE 5:

Fis	cal Year	CSC	PSC	WSC	System
	FY13	505	467	729	1,701
	FY14	586	436	801	1,823
	FY15	606	408	791	1,805
	FY16	559	408	800	1,767
	FY17	598	507	781	1,886
Baseline	FY18	628	419	812	1,859
	FY19	575	445	750	1,770
	FY20	565	420	835	1,820
	FY21	491	385	934	1,810
	FY22	520	388	990	1,898

Total Degrees Awarded, Transfer Students

INDICATOR 6

Graduation and retention rates draw primarily upon the first-time, full-time student populations and fail to capture an important subset of students who impact degree production in the Nebraska State College System. Over the past ten years, transfer students have represented an increasing share of the degrees awarded. The System experienced a high of 478 degrees completed by transfer students in AY19, but this past year has reflected a decrease in the number of transfer graduates from 462 in AY21 to 426 in AY22.

The trend in higher education today is for a vast majority of the students who walk across the stage at graduation to have earned credit from a college or university other than the one awarding the degree. While a portion of these credits reflects first-time, full-time students who supplement credits from other colleges or universities, a growing number reflect swirling or transfer students who began their academic journeys elsewhere. A portion of these represent students

who completed an associate degree at a community college, signifying the critical importance of structured 2 + 2 programs and articulation agreements between institutions. Others represent students who, after earning credit, transfer due to lack of fit, change in academic pathway, or life circumstances that may place-bound a student to a new geographic location. Regardless, assisting these students through the course-by-course equivalency process, offering effective academic

advising, and providing the necessary financial support are critical for ensuring a larger number of students can achieve degree completion. The goal of the State College System is to increase the total number of transfer students who complete a degree by an additional 26% to a total of 600 by 2025.

- Decrease of 36 degrees awarded (1-Year Δ)
- Decrease of 41 degrees awarded (Baseline Δ)

PERU STATE COLLEGE

Student Success for Transfer Students

Peru State College is committed to transfer student success. The College's unique mix of programs and opportunities provides transfer students the right tools to complete their degrees. Articulation agreements and numerous publicized transfer equivalencies start students on the path for academic success. The proactive approach to advising and specifically tailored transfer student orientation helps connect students to available resources on campus. Personal communication keeps online transfer students on track if they receive academic alerts or miss deadlines.

At Peru State, transfer student retention and persistence remain high, with more than 82% of transfer students returning for their second term of coursework.

College Level Data

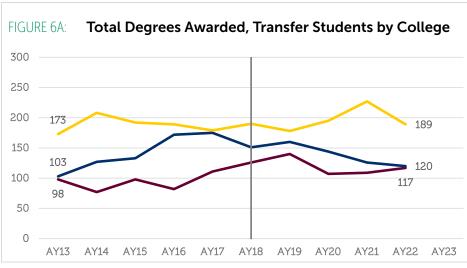

TABLE 6: **Total Degrees Awarded, Transfer Students**

	AY13	98	103	173	374
	AY14	77	127	208	412
	AY15	98	133	192	423
	AY16	82	172	189	443
	AY17	111	175	179	465
Baseline	AY18	126	151	190	467
	AY19	140	160	178	478
	AY20	107	144	195	446
	AY21	109	126	227	462
	AY22	117	120	189	426

GOAL:

Institutional and Academic Quality

Deliver an array of high-quality academic programs and curricular activities that successfully prepare students for the range of careers they will experience after graduation.

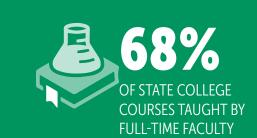

The foundation for all post-secondary institutions is to effectively prepare students through the completion of their chosen degree programs. Stakeholders expect institutional and academic quality in developing these educational programs to ensure a rigorous and engaging curriculum delivered by highly qualified faculty and staff. Four performance metrics were

identified to measure the Colleges' success in maintaining institutional and academic quality through 2025. First, a heavy reliance on applied, authentic, and engaging experiences is a driving tenant for the curriculum's educational opportunities. The Colleges seek to expand this applied learning by increasing the number of students who participate in academic-based experiential learning

activities each year. Students also learn best in environments that incorporate the technology and resources that mirror the world of work they expect to enter. Maintaining capital investments in infrastructure to support student learning are critical in accomplishing these two goals. The final two performance metrics emphasize the level of engagement and credentials of the faculty/staff who

connect with students on a day-to-day basis. The State Colleges have a low faculty/staff to student ratio and a high percentage of coursework delivered by full-time faculty across the System, promoting success for the many students being served.

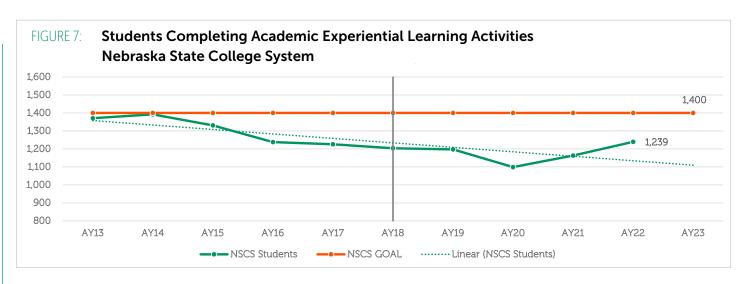

GOAL: Institutional & Academic Quality

Nebraska State College System | 21

Students Completing Academic Experiential Learning Activities

INDICATOR 7

The number of students who completed one or more academic experiential learning activity, such as field experiences, internships, workbased learning placements, and shadowing, has decreased slightly over the past decade across the State Colleges. Over the past two years, however, this trend has begun to reverse as the number of students participating in this range of activities increased by 13% compared to AY20.

A growing number of degree programs encourage students to participate in some form of experiential learning activity prior to graduation. Similar to fields like Education and Nursing, the student teaching or clinical experience provides opportunities for students to engage in authentic experiences in their career areas while presented in an environment guided by trained faculty and mentors. Exposure to these real-world applied experiential learning opportunities provides students with opportunities to apply theory to practice, connect with regional employers, and further solidify their interest in their

chosen degree programs. While the term used to encapsulate these experiential learning activities (i.e., internships, practicum, clinical, cooperative educational experience, student teaching) vary by discipline, the intended outcomes remain the same. Additionally, research indicates that students who participate in paid internships or cooperative experiences with employers before graduation have a 68.3% likelihood of receiving an employment offer with those same companies.4 New State investments in programs like the Career Scholarships and the Corrections Leadership Scholarships are built on this premise. Increasing

the number of State College students who engage in experiential learning opportunities prior to graduation positively impacts placement rates for these students in Nebraska. The benchmark for this metric was set at 1,400 as a stretch goal for improving the number of students engaged in academic-based experiential learning activities each year by 2025.

- 76 more experiential learning opportunities (1-Year △)
- 35 more experiential learning opportunities (Baseline Δ)

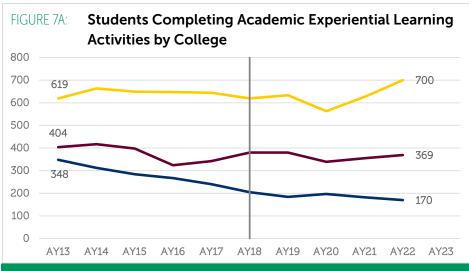

WAYNE STATE COLLEGE

Building Cooperative Education Programs

Wayne State College offers the Career Scholars Cooperative Education Program for career-minded students who want to spend their senior year of college living and working in Norfolk, and is in the process of building additional programs in Grand Island and Columbus. Cooperative education combines classroom education with work experience for college credit. This new scholars program supports workforce and economic development in Nebraska while making a four-year degree even more affordable. Students must be passionate about earning a degree in business, information technology, electronic media, journalism, criminal justice, and industrial technology and desire a robust, year-long hands-on learning experience. Program benefits include a scholarship ranging from \$2,500-\$15,000 per year toward tuition and housing. After three years on campus, students complete their senior year while living in designated communities, where they will be hired and mentored by participating business partners, earning 18 credit hours while working 30 hours per week at a paid job using skills relevant to their degrees.

Capital Investment in Infrastructure that Supports Student Learning

INDICATOR 8

Over the past decade, the State Colleges have invested more than \$195M in infrastructure that supports student learning, such as instructional facilities, student support facilities, residence halls, and athletic facilities. This annual investment of almost \$20M has produced significant upgrades for the Colleges to modernize their campus communities. Significant investments in the past two years have positively impacted the overall growth and resulted in an increase of \$3M in the 3-year rolling average of investments across the State Colleges.

The Nebraska State College System has made concerted efforts toward critical infrastructure investments that directly impact student learning. Since 2000, the Colleges, State of Nebraska, College Foundations, and students have invested just under \$200 million toward maintaining infrastructure at each of the Colleges. Most recently, these partners successfully secured authority for a \$28 million renovation and construction of the Math & Science facility at Chadron. This type of investment produces a tangible return that includes:

1) enrollment growth in critical workforce degree programs; 2) expanding capacity for regional outreach as communities in the region draw upon the facility for educational opportunities; 3) ongoing evolution of the teaching and learning process using facilities that can be adapted to evolving learning styles, and 4) increasing capacity to recruit and retain talented faculty. The Chadron Math & Science project is just one example of why ongoing and targeted investments are critical to maintaining campus infrastructure

to attract and retain students in their geographic regions. The State Colleges need to continue this recent trend in infrastructure investments in order to successfully work toward the three-year rolling average benchmark that has been set, to ensure coordinated and ongoing investments that positive impact student success.

- Increase of \$2.9M(1-Year Δ)
- Decrease of \$3.6M (Baseline Δ)

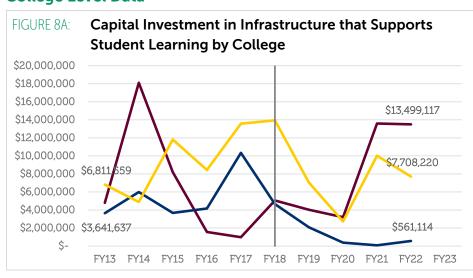

NEBRASKA STATE COLLEGES

Investing in Capital Projects to Provide High-Quality Student Learning

Each State College has made several significant investments in capital projects over the past two years to ensure the campus infrastructure's ongoing viability. Peru State College recently completed renovations for Delzell Hall and its Performing Arts Center, which holds numerous fine arts competitions and events in Southeast Nebraska. The new Center for Applied Technology at Wayne State College provides a valuable addition to the Industrial Technology and Advanced Manufacturing programs at the College, while renovations were recently completed to transform Benthack Hall into a state-of-the-art education and counseling center on campus. The recent completion of the Math/Science renovation and addition at Chadron State College resulted in the largest construction project to date in the State College System, and significant upgrades to the Football Stadium complex, as well as a new Track and Field facility, will ensure the College remains a regional hub.

College Level Data

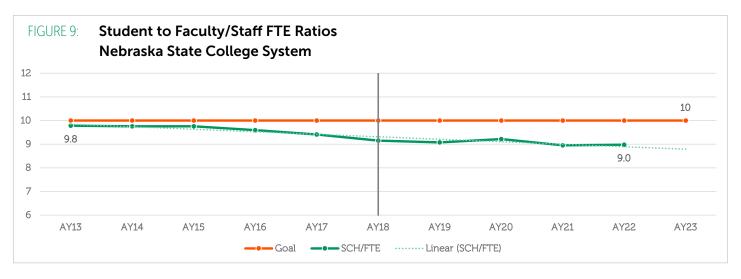

Capital Investment in Infrastructure that Supports TABLE 8: Student Learning

Fi	scal Year	csc	PSC	WSC	System (3-yr rolling average)
	FY13	\$4,801,232	\$3,641,637	\$6,811,559	\$27,900,026
	FY14	\$18,105,618	\$5,994,297	\$4,892,784	\$24,990,318
	FY15	\$8,188,984	\$3,674,999	\$11,816,715	\$22,642,608
	FY16	\$1,557,260	\$4,162,041	\$8,436,945	\$22,276,548
	FY17	\$982,093	\$10,336,885	\$13,569,211	\$20,908,378

Student to Faculty/ Staff FTE Ratios

INDICATOR 9

The ratio of full-time equivalent (FTE)students served by the State Colleges per full-time equivalent faculty and staff has decreased from an average ratio of 10.6:1 in AY11 to 9.0:1 for the most recent academic year⁵ (AY21). This average has been maintained at 10:1 or below for the past ten years.

Consistent with its open-access mission, the State Colleges serve an increasing number of first-generation and underrepresented students who need additional academic and student support services. An array of resources are in place to provide out-of-class support in the form of advising and tutoring, as well as programs and services attending to the student as a whole. In addition, the capacity for students to have more direct engagement with their faculty contributes to their overall

success in their coursework. When presented with the opportunity to teach in a smaller class environment, faculty have been found to use more hands-on projects, assign tasks requiring increased creative thinking, and engage in teambased learning. Smaller classes present opportunities for faculty to apply more rigorous expectations for students while also increasing shared responsibility for their learning. Class size is undoubtedly a function of enrollment growth

or loss. Maintaining a 10:1 faculty/ staff-to-student ratio through 2025 is an important benchmark that will require targeted efforts to manage potential enrollment growth with faculty and staff resources necessary to maintain these thresholds.

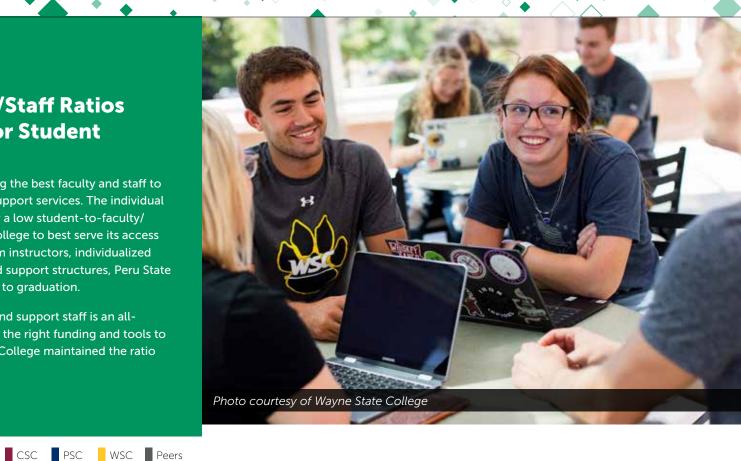

- Increase of 0.3% in Student to Faculty/Staff Ratios (1-Year Δ)
- Decrease of 0.17% in Student to Faculty/Staff Ratios (Baseline Δ)

PERU STATE COLLEGE

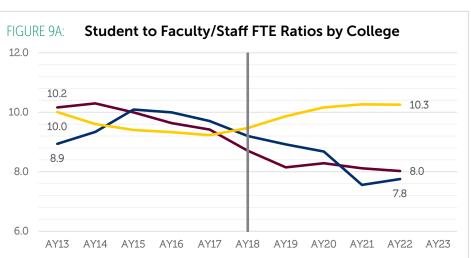

Low Student to Faculty/Staff Ratios Create Opportunities for Student Success

Peru State College is committed to recruiting the best faculty and staff to provide excellent instruction and student-support services. The individual attention and smaller class sizes afforded by a low student-to-faculty/ staff ratio is an important strategy for the College to best serve its access mission. By offering individual attention from instructors, individualized learning accommodations, and personalized support structures, Peru State helps students remain in college and persist to graduation.

Decreasing the ratio of students to faculty and support staff is an all-College effort, with Peru State having found the right funding and tools to decrease that ratio steadily since 2015. The College maintained the ratio when compared to last year.

College Level Data

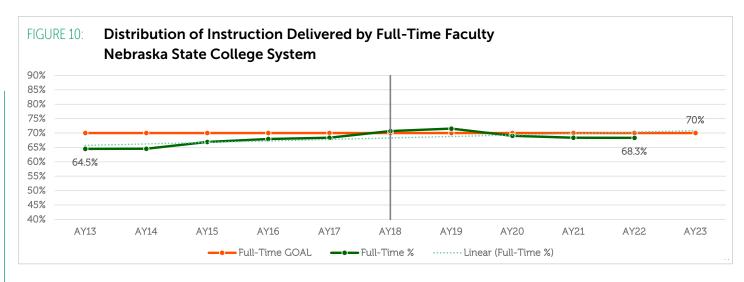

Student to Faculty/Staff FTE Ratios TABLE 9:

	AY22	8.0	7.8	10.3	9.0

Distribution of Instruction Delivered by Full-Time Faculty

INDICATOR 10

The percentage of instruction being delivered by full-time faculty versus part-time or term faculty has decreased slightly for the past three years since reaching the System high of 71.5% in AY19. The percentage declined by .1% when compared to AY21.

Full-time faculty serve a critical role in fostering student persistence, retention, and graduation rates at their College. Students are best served when exposed to faculty who have a vested long-term commitment to the educational program in which they teach. Part-time or term faculty often provide similar quality teaching, but full-time faculty members contribute the essential stability necessary for developing and maintaining the curriculum and meeting out-of-class needs for students. Additionally,

full-time faculty serve an important advising role for students, both academically and professionally. Faculty who remain active in their discipline also advance the scientific knowledge necessary for continuing to expand key theories and concepts that students need in the evolving workplace of the future. When these faculty take on an active research agenda, students are provided the opportunity to engage in applied research at the undergraduate level, which enriches their overall academic experience and better

prepares them for graduate or professional programs. This benchmark was set at maintaining a 7:3 distribution for full-time faculty to provide the core instruction to students across the State College System.

- 0.1% Decrease of Instruction

 (Baseline Δ)

CHADRON STATE COLLEGE

Prioritizing Full-Time Faculty Instruction

Chadron State College is proud that more than 77% of course instruction is delivered by full-time faculty, therefore ensuring students receive the majority of their education taught by instructors experienced in their fields and committed to the college's mission to foster knowledgeable and engaged leaders. Chadron State employs a number of high-quality part-time faculty who teach online, but the majority of instructors for face-to-face courses are full-time faculty. Chadron State prioritizes the recruitment and retention of full-time faculty who demonstrate instructional effectiveness and positively impact student success.

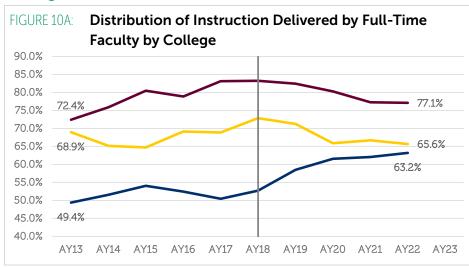

TABLE 10: Distribution of Instruction Delivered by Full-Time Faculty

GOAL:

Workforce and Economic Impact

Expand capacity for the Colleges to produce graduates who meet the workforce needs for Nebraska and to strengthen their role as change agents for the rural communities they serve.

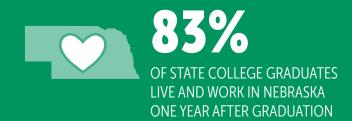

States invest in their educational institutions to produce a skilled workforce to meet business and industry needs and promote economic growth. The State Colleges identified five performance metrics to assess their impact on the workforce and economic development in Nebraska. Expanding the pipeline by increasing the number of graduates produced each year is important,

but so is developing pathways and opportunities for students to be retained in Nebraska after graduation. Increasing the percentage can ensure that even with consistent graduate production, a higher number of students are employed in Nebraska to address the ongoing workforce shortages. To further expand the number of graduates in High Skill, High Demand, and High Wage (H3) jobs,

benchmarks were established for the number of graduates in crucial workforce programs employed in Nebraska one year after graduation. Expanding enrollment capacity can also increase overall placement, so this approach was mirrored by challenging the Colleges to increase overall enrollment, as well as expand enrollment in seven key workforce programs projected to be in high demand

by the Nebraska Department of Labor. Lastly, the State's investment and tuition revenue economically impacts the State overall, with a more direct impact on the region and communities served by the State Colleges. The goal is to continue to expand this economic impact through 2025.

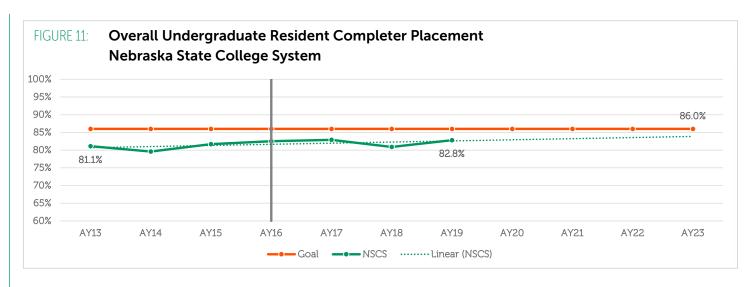

Overall Undergraduate Resident Completer Placement in Nebraska

INDICATOR 11

Data depicting undergraduate resident completer placement (employed or enrolled in graduate programs) after degree completion are available beginning with the 2012-13 Nebraska State Colleges graduates.

Over the past four years, undergraduate resident completer placement has averaged 82%, increasing slightly by nearly 2% for the most recent graduating class.

Beginning July 2019, the Nebraska State College System began analyzing the placements of its undergraduate completers one year after graduation. Data for this project came from three main sources: the Nebraska State College System, the Nebraska Department of Labor (NDOL), and the National Student Clearinghouse (NSC). In the initial step of the placement search, NDOL employment data systems are queried to determine the first-year job placement outcomes of all degree majors (in a given cohort)

identified by the System. Next, the same student list is submitted to the NSC to gather information on students enrolled in collegiate coursework after graduation. Several factors influence undergraduate completer placement, including appropriate academic preparation for advanced graduate work following undergraduate degree completion, encouraging student participation in internship or field experiences in Nebraska, and the distribution of the resident and non-resident students served at each of

the three State Colleges. The System has established a goal of 86% of undergraduate resident completers placed in Nebraska by 2025, slightly higher than the current linear placement trajectory.

- 2% Increase in Resident Completer Placement in Nebraska (1-Year Δ)
- 1% Increase in Resident Completer Placement in Nebraska (Baseline Δ)

NEBRASKA STATE COLLEGES

Creating Nebraska's Workforce for Tomorrow

Growing Nebraska's workforce to address the 32,000 projected job openings expected by 2025 requires a multi-faceted approach, including strategies to increase the number of Nebraska high school graduates going on to college in Nebraska and to engage the business community to provide meaningful internship opportunities for students at Chadron, Peru, and Wayne State Colleges. The Career Scholarship program effectively combines these strategies by providing opportunities to recruit first-generation students, providing pathways to key workforce degree programs, and connecting students with area businesses to facilitate employment opportunities after graduation. When combined with innovative programs like the Rural Business Leadership Institute (RBLI) at Chadron, Correction Leadership Scholarship Program at Peru, and the Growing Together Initiative at Wayne, the State Colleges create unique applied and experiential learning opportunities to meet Nebraska's workforce needs.

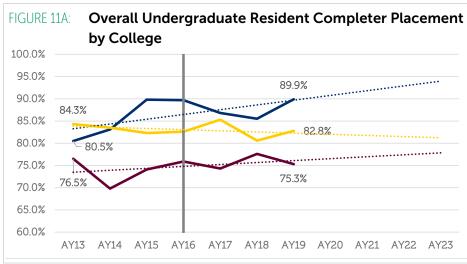

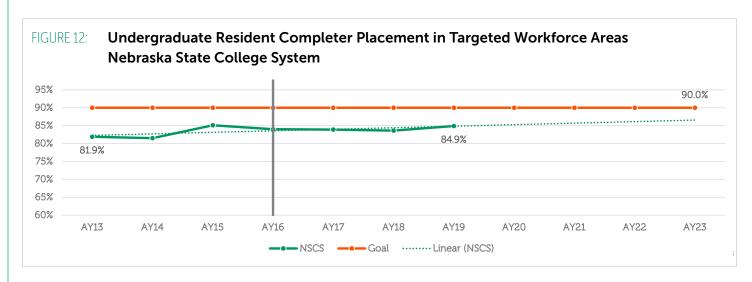

Overall Undergraduate Completer Placement in TABLE 11: Nebraska

	AY13	76.5%	80.5%	84.3%	81.1%
	AY14	69.8%	83.1%	83.5%	79.6%
	AY15	74.1%	89.8%	82.3%	81.7%
Baseline	AY16	75.9%	89.7%	82.6%	82.5%
	AY17	74.3%	86.8%	85.3%	82.9%
	AY18	77.6%	85.5%	80.6%	80.9%
	AY19	75.3%	89.9%	82.8%	82.8%

Undergraduate Resident Completer Placement in Targeted Workforce Areas

INDICATOR 12

The Nebraska State College System has targeted six key degree areas necessary for meeting the future workforce needs for the State, in addition to RHOP and RLOP programs. Over the past decade, a lower percentage of students have completed degrees in these critical areas. Still, placement has traditionally been at a higher level when compared to the overall undergraduate resident completer placement rate. This past year resulted in one of the highest placement rates in critical workforce areas at 84.9%.

During the 2018-19 academic year, College Presidents engaged with stakeholders and industry representatives across Nebraska to identify critical degree programs necessary for meeting workforce shortages. The areas identified include degree programs in Rangeland Management, Business Administration, Education, Industrial Technology, Computer Information Systems, and Criminal Justice. A total of 17-degree programs across the three State Colleges align directly with these six workforce

areas, and efforts are in place to increase enrollments and degree production in these areas to encourage resident student placement in Nebraska. The current linear trend for the System projects an increase in placement over the next five years, and a stretch goal of growing to 90% or beyond has been set for resident undergraduate completers by 2025. Efforts to increase workforce scholarship opportunities, evolve programs to meet changing workforce demands, and infuse internship and

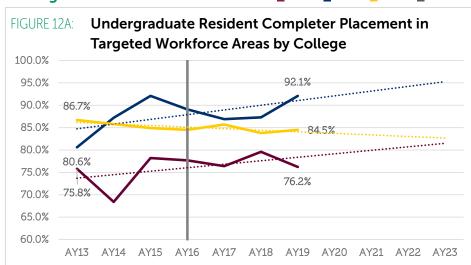

experiential learning opportunities into program requirements represent strategies employed by the Colleges to systematically work toward achieving this benchmark over the next five years.

College Level Data

CHADRON STATE COLLEGE

Developing Workforce Programs

Chadron State continues to develop programs and partnerships dedicated to keeping graduates in Nebraska and employed in targeted workforce areas. CSC has partnered with a talent recruiting platform, allowing employers to connect directly to students and alumni. Qualified students and alumni have the opportunity to be hired in high-demand occupations. CSC is proud of its commitment to growing Nebraska's rural workforce. The Rural Business Leadership Initiative (RBLI) is in its fourth year and provides educated and qualified employees in several fields, including agribusiness, banking, and accounting.

The college's long-standing commitment to developing rural workforce through the RHOP and RLOP programs continues today. Since the early 1990s, more than 370 RHOP students have completed their medical studies. RLOP is a relatively new program, but CSC graduates are successfully transitioning to graduate law programs.

Additionally, CSC has partnered with Nebraska Methodist College on a program dedicated to producing Respiratory Therapists in western Nebraska, providing internships and networking opportunities in the panhandle.

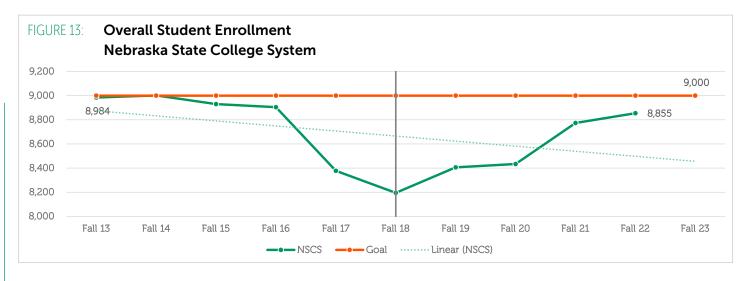

Undergraduate Resident Completer Placement in TABLE 12: **Targeted Workforce Areas**

Academic Year		CSC	PSC	WSC	System
	AY13	75.8%	80.6%	86.7%	81.9%
	AY14	68.4%	87.2%	85.8%	81.5%
	AY15	78.2%	92.1%	84.9%	85.1%
Baseline	AY16	77.7%	89.1%	84.5%	84.0%
	AY17	76.4%	86.9%	85.7%	83.9%

	AY19	76.2%	92.1%	84.5%	84.9%

Overall Student Enrollment

INDICATOR 13

The Fall headcount enrollments
at the State Colleges had
experienced a moderate
decline over the past decade,
with a 1% decrease in total
headcount when compared
against the Fall 2012 term. For
the most recent academic year,
the System experienced a 1%
increase when comparing
Fall 2021 and Fall 2022 terms,
and an overall increase of 8%
since Fall 2018.

Maintaining enrollments at each of the State Colleges is critical to sustaining the open-access mission for Nebraska, along with serving the rural communities within the Colleges' geographic regions. Enrollments represent a complex mixture of students who extend beyond recent high school graduates who serve as the traditional student population. As this market has grown more competitive, the Colleges continue to work more aggressively with school districts in their geographic regions, while also providing a low-cost option for non-resident students. Encouraging

student in-state enrollment directly after high school increases the likelihood these students will remain in Nebraska once they have earned their degree. The same is true for non-resident students who are recruited from their home states after graduation. Beyond traditional high school graduates, enrollments represent a complex mix of part-time, ready-adult, nontraditional, transfer, concurrent credit, graduate, and international students being served by the three State Colleges. The appropriate mix of degree and credential offerings (bachelors, masters,

and certificates) are necessary to encourage many of these place-bound students to attend college. Additionally, expanding transfer and international student enrollments requires ongoing evaluation and evolution of partnership agreements that allow students to successfully transition with credit for coursework completed at other postsecondary institutions.

- Increase of 1% in Student
 Enrollment (1-Year Δ)
- Increase of 8% in Student
 Enrollment (Baseline Δ)

WAYNE STATE COLLEGE

Enrollment Continues to Climb

Wayne State College enrollment has grown for the fifth straight year, with a 4.2 percent increase over fall 2021 and a 45 percent increase since 2017. The College's graduate programs enrollment continues to grow, with a 12 percent increase over last year and a nearly 71 percent increase in the past six years. Wayne State's total headcount increased by 193 students over 2021, with a 3.6 percent increase in new transfer students. The Class of 2026 is one of the largest freshman classes in the College's history at 790 students.

Wayne State College also works hard each year to ensure students have access to an affordable education in a premium learning environment. During the past year, these efforts included freezing tuition and increasing financial aid benefits, renovating and expanding campus buildings, and securing partnerships and academic opportunities to provide excellent pathways to degrees.

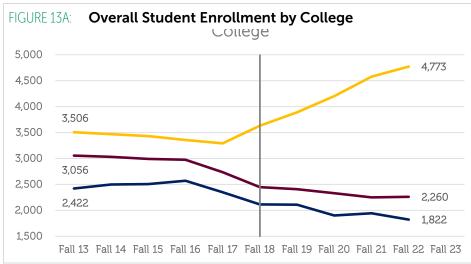

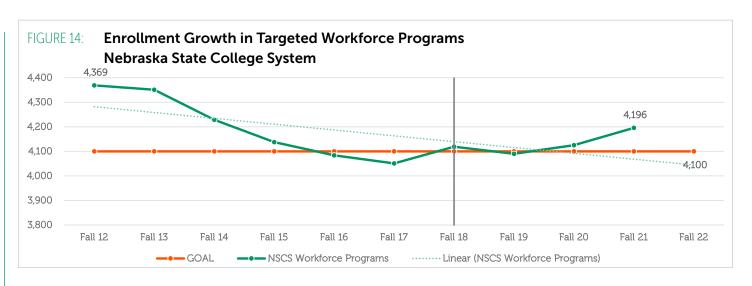

TABLE 13: **Overall Student Enrollment**

	Cohort	CSC	PSC	WSC	System
	Fall 13	3,056	2,422	3,506	8,984
	Fall 14	3,033	2,499	3,470	9,002

	Fall 20	2,330	1,902	4,202	8,434
	Fall 21	2,250	1,944	4,580	8,774
	Fall 22	2,260	1,822	4,773	8,855

Enrollment Growth in Targeted Workforce Programs

INDICATOR 14

The Nebraska State College
System has targeted six key
degree areas necessary for
meeting the future workforce
needs for the State, in
addition to the RHOP and
RLOP programs. From 2010
to 2019, the percentage of
students enrolled in degree
programs that align with these
critical areas had decreased.
However, enrollments in
critical workforce areas have
increased by 1.9% for the
second consecutive year.

While enrollment growth is important to ensure financial prosperity for each State College, ensuring enrollment trends align with the workforce needs⁶ of the state is also a key priority. During the 2018-19 academic year, College Presidents engaged with stakeholders and industry representatives across Nebraska to identify critical degree programs necessary for meeting workforce shortages. The areas identified include degree programs in Rangeland Management, Business Administration Education

Industrial Technology, Computer Information Systems, and Criminal Justice. A total of 17 degree programs across the three State Colleges align directly with these six workforce areas. Efforts to increase enrollments in these areas and employer partnerships to encourage student placement in Nebraska are being implemented. To correct the downward linear trend for these workforce areas, a benchmark of 4.100 enrollments in targeted majors has been set for 2025. Efforts to increase workforce scholarship opportunities, ongoing

program evolution to meet changing workforce demands, and critical investments in facilities and faculty represent the Colleges' strategies to systematically work toward achieving this benchmark over the next five years.

PERU STATE COLLEGE

Innovative Scholarship Opportunities

With the Nebraska Legislature's strong support, Peru State has implemented two new workforce development programs. The Corrections Leadership Scholarship Program represents a one-of-a-kind collaboration between the Nebraska Department of Correctional Services and the College. It helps Nebraska address the unique challenges of recruiting and retaining a strong corrections workforce. Students selected for this program receive scholarships and paid internships, propelling them toward a leadership career in correctional services.

The Career Scholarship Program provides \$1 million in scholarships across the State Colleges. Students in the program pursue careers in critical workforce areas necessary for Nebraska's continued economic growth. At Peru State, eligible students choose from majors in education, criminal justice, and business administration. These scholarships help increase the number of graduates in high-demand fields while providing affordable degree access and reducing student debt.

Economic Multiplier for Region/State

INDICATOR 15

When adjusting for inflation, the State College System has continued to make a significant impact on the economy of the State, resulting in growth exceeding \$400 million over the past seven years. With an increase in enrollment over the past year, the tuition revenue has generated an increase of 6.5% when compared to the economic impact in FY22.

The State Colleges make a substantial impact on the State of Nebraska and the regions they serve, as they have become significant anchors in their rural service areas. The vast majority of dollars are spent on employee salaries and for purchasing services from regional businesses.⁷ Student expenditures and funds spent by parents include food, gas, and other goods, as well as rental of off-campus housing.8 A number of the metrics outlined in the strategic plan are designed to facilitate growth in this overall economic impact for the State,

resulting from enrollment growth (including non-resident and international students), improving retention and graduation rates, and degree production. One factor difficult to calculate in these estimates is the economic impact generated from increasing degree attainment in Nebraska. Bachelor and graduate degree holders make a significant impact in their local communities beyond just the tax dollars generated from income annually. The goal of increasing in-state placements also further contributes to this intangible

economic impact. The System surpassed the benchmark of \$450 million for the first time. It was set as a stretch goal to dramatically increase the impact the State Colleges have on the investment made by the State and extend beyond the current 8:1 return on investment in State General Fund dollars.

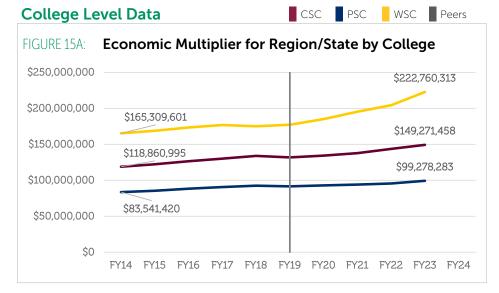

- Increase of \$29.3M in Economic
 Impact (1-Year Δ)
- Increase of \$72.3M in Economic
 Impact (Baseline Δ)

NEBRASKA STATE COLLEGES

Positive Economic Impact for Nebraska

The State Colleges create value and have a significant positive financial impact, regionally and across the State. Spending by students, employees, and visitors in each community drives economic growth. As significant regional employers, each College purchases goods and services, continuously cycling state general fund and tuition revenue through the local economy. For example, Peru State College is the largest employer in all of Nemaha, Otoe, Johnson, Pawnee & Richardson counties combined, employing 168 staff, with 90% living in Nebraska. The state's ongoing investment in facilities and infrastructure enables each of the Colleges to serve as a regional hub, drawing middle/high school students to various academic (math and history competitions; engineering camps) and extracurricular programming (Show Choir Festivals; filmmakers workshops) offered on each campus.

Economic Multiplier for Region/State TABLE 15:

GOAL:

Access and Affordability

Preserve the open-access mission providing all students with equitable opportunities to pursue affordable undergraduate and graduate degrees in Nebraska.

State Colleges were envisioned as open access institutions to provide a four-year degree opportunity for all students in Nebraska, while keeping educational pathways affordable for students/families. Five performance metrics were identified to measure Colleges' success in maintaining this outcome through 2025. The State plays a crucial role in making the State Colleges affordable through general fund investments each year. Over the past decade, the overall distribution of cost between the State and students has declined. The State Colleges aspire to return to 70 percent State support by 2025. With the State investment comes an assurance the State Colleges are run efficiently when comparing the average net price and the spending per degree

when compared to the Colleges' peer institutions. Benchmarks have been set for these two performance indicators to maintain the existing gap between the State Colleges and their peers. Lastly, the return on investment for students can be evaluated by measuring the median debt at graduation for \$49,500 Colleges' \$48,576

\$45,770

Midland

and

students

keeping debt low over the next five years by providing scholarship opportunities to alleviate the unmet need experienced by students/families that lead them to borrow toward their educational expenses.

Nebraska State College System 43 GOAL: Access and Affordability

Percentage of Funding (General Fund vs. Net Tuition)

INDICATOR 16

The opportunity to grow the necessary workforce for Nebraska is contingent on maintaining an affordable four-year educational option for students. A significant relationship between tuition costs and the general funding available from the Governor and Legislature each year exists. Over the past decade, general funding has remained fairly consistent, with percentages ranging from 63%-65% of total fund costs each year. This past year reflected a modest increase of 1.5% in general funding to 65.6%, as compared to net tuition at 34.4% of total.

Several factors contribute to the distribution of funds referenced in this metric. First, maintaining general fund support is a significant factor since, at the current threshold, a 1% increase in State general fund support can assist in reducing student tuition costs by 2%; the inverse is also true for a funding decrease. As the general fund allocation declines over time, larger increases are needed to maintain the core operations at the three State Colleges. Second, the Board of Trustees is also tasked

with keeping tuition and fee rates as low as possible to maintain this balance, so the two are highly interrelated, resulting in tightly managed increases that are aligned with State general fund support. Student enrollment growth is the final contributing factor. As enrollments decline, the decline in cash revenue can positively impact the State's share of higher education costs for students. As enrollments increase, the additional cash revenue alternatively skews the distribution. As a result, strategic investments

from increased enrollments and tuition revenue should be made to cover core operational costs. The goal for this metric has been set at 70% or higher to encourage strategic engagement on these two factors to maintain affordability.

- 1.5% Shift from Student Tuition Funding to General Fund (1-Year Δ)
- 1.7% Shift from Student Tuition Funding to General Fund (Baseline Δ)

NEBRASKA STATE COLLEGES

A Tradition of Legislative Support

For the 2022-23 Biennium, the Governor and Legislature increased investment in the State Colleges by more than 8% through General Fund support. In response, the Board of Trustees froze tuition and fees to limit the impact on students/families, especially as they continue to respond to the pandemic. Nebraska continues to be ranked sixth nationally in relation to support received from state appropriations per student FTE (22.8% increase since 2010). The vast majority of other states have experienced significant declines in the support provided to colleges/universities across all sectors, with at least seven states reflecting more than a 30% decline in public higher education appropriations per FTE when adjusted for inflation (Pennsylvania, Iowa, Indiana, Rhode Island, South Carolina, Louisiana, and Arizona). Nebraska's 10-year percentage change positions the state as one of just fifteen nationwide, reflecting a positive increase at 10% or higher.

Median Undergraduate Debt at Completion

INDICATOR 17

The average cumulative principal borrowed per undergraduate borrower9 has continued to increase steadily over the past decade, even after adjusting for the rate of inflation. Since FY09 the average loan amount for Nebraska State College students has increased by over 54% when compared against students graduating this past year. However, students across the System experienced a minimal decrease in their collective debt in FY20, when compared to FY19.

The NSCS was unable to update these data because the College Scorecard was not updated at the time of publication. A combination of factors contributes to the overall borrowing rates for degree holders, driven mainly by the overall net-price at each College. Increases to cover a portion of core needs through general fund increases each year assist in reducing tuition and fee expansion for students. Additionally, the Colleges' capacity to increase the grant/aid available to students, increases in Pell awards, and

ongoing support through programs like the Nebraska Opportunity Grant (NOG) work together to provide low-income students with resources to decrease their overall debt load at graduation. This goal was set to keep the overall debt load for students at a rate lower than the current trends (suggesting if similar patterns continued to transpire, the average loan amount would exceed \$27,000). To meet this challenge, the Nebraska State College System has set a benchmark of an average loan amount not exceeding \$20,000

by 2025. Even at this level, students earning their degree generate a significant return on investment for these dollars, as the average bachelor's degree holder is projected to earn more than \$1 million more over their career compared to what can be earned by those only holding a high school diploma.

- Decrease of \$24 in Median
 Undergraduate Debt (1-Year Δ)
- Increase of \$405 in Median
 Undergraduate Debt (Baseline Δ)

CHADRON STATE COLLEGE

Decreasing Student Debt

Chadron State College continues to optimize its awarding process to ensure qualified students receive scholarships that decrease their out-ofpocket costs. In addition, when working with students on their financial aid, Chadron State counsels students to borrow only what they need. As part of the College's advising plan, faculty advisors encourage students to take 15 credit hours each semester with the goal of graduating in four years, another way to minimize the costs of a degree and reduce student debt. Chadron State remains an affordable and accessible option for students. The college's average total spending per degree is \$73,335, compared to the average for all U.S. public universities of more than \$115,000. Additionally, the average indebtedness for Chadron State graduates remains low. The average amount borrowed by students in the fiscal year 2020 was \$19,295.

College Level Data

Average Net Price Compared to Peers¹⁰

INDICATOR 18

Net price¹¹ for students and families has increased by roughly 50% during the past decade for the Nebraska State Colleges. The impact of general fund appropriations and increasing costs above the rate of inflation have continued to drive up out-of-pocket costs for students. When compared to the past year, a 3.7% increase in net price has occurred for students. Before FY16, the State Colleges consistently reflected a lower net price when compared to their peer institutions. These institutions have gained considerable ground over the past seven years, with this past year, resulting in a lower net price than the State Colleges for the fifth consecutive year.

Families traditionally evaluate total educational costs by calculating tuition, mandatory fees, room, board, textbooks, and other anticipated living costs incurred. Net price can be assessed by then subtracting the overall grant/ aid received from the institution to more accurately calculate the out-of-pocket costs families are likely to incur. Tuition and fee costs can be reduced through ongoing general fund support from the State, while also holding tuition increases in line with standard higher education indexes. Additionally, the capacity for the State Colleges

to draw upon Foundation support through scholarships, strategic use of remissions/waivers, and public/ private partnerships can each have a direct impact on increasing the grant/aid available to help hold down the overall net price for students. Not only has the metric increased over the past six years, but the past four years have marked the first instance where the net price for peers was at a lower rate when compared to the State Colleges. The benchmark for this metric has been set at \$14,000 with a goal of not exceeding this level by 2025 and gaining a 5% gap between the

Colleges and their peers. Under current trends during the past decade, this figure was expected to exceed \$16,000 by this same time frame, if strategic efforts were not implemented to help hold the cost down. The 3.7% increase this past year reflects a negative impact on the State Colleges' progress on this particular benchmark.

- Increase of \$517 in Net Price (1-Year Δ)
- Increase of \$1,404 in Net Price (Baseline Δ)

WAYNE STATE COLLEGE

Keeping College Affordable

To address the needs of the diverse student population Wayne State serves, the College adopted "One Rate at Wayne State." The program sets the nonresident undergraduate tuition equal to the resident undergraduate rate and provides additional incentives for non-residents to attend Wayne State. This may lead to new Nebraska residents, as a number of those students may choose to remain in Nebraska to help build the state's workforce after graduation.

The new Nebraska State College Tuition Guarantee provides financial support to undergraduate students by filling the gap between the Pell Grant award and tuition costs, thus ensuring that qualified Nebraska residents pay no tuition. This gap will be filled by applying federal grants, state grants, College remissions, or Wayne State Foundation scholarships. This guarantee gets to the heart of who Wayne State students are and what they need to succeed in college while helping them graduate with minimal debt.

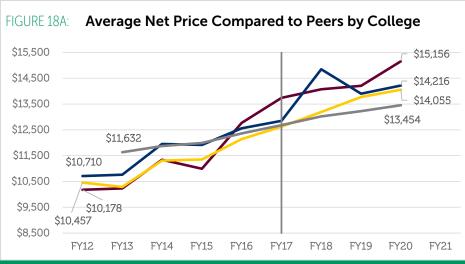

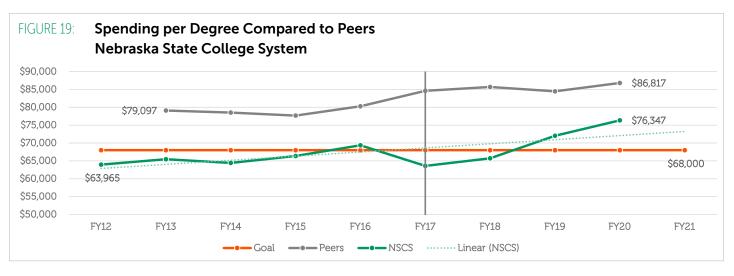

Average Net Price by College TABLE 18:

Fis	cal Year	CSC	PSC	WSC	System
	FY12	\$10,178	\$10,710	\$10,457	\$10,448
	FY13	\$10,233	\$10,765	\$10,288	\$10,429
	FY14	\$11,344	\$11,955	\$11,307	\$11,535
	FY15	\$10,993	\$11,918	\$11,353	\$11,421
	FY16	\$12,766	\$12,557	\$12,139	\$12,487

	FY18	\$14,073	\$14,846	\$13,193	\$14,037
	FY19	\$14,203	\$13,902	\$13,770	\$13,958
	FY20	\$15,156	\$14,216	\$14,055	\$14,476

Spending per Degree Compared to Peers

INDICATOR 19

The gap in spending per degree, when compared to its Peer institutions, 12 has decreased significantly over the past year. A gap that was just under \$20,000 for FY18 is now: just under \$10,500 for FY20. In addition to this adverse impact on the gap, the State Colleges exceeded the \$68,000 spending per degree goal by over \$8,000, which is the highest amount per degree recorded for the System.

Several factors can influence the overall spending per degree at colleges and universities. As general fund appropriations remain fixed, an increase in degree production in a given year can have a dramatic impact on reducing the overall cost-to-degree calculation. Additionally, in a year when degree production drops with flat or increasing state appropriations, the inverse occurs, driving up the cost to the College. Enrollment increases, improving persistence and retention rates, providing successful pathways for

transfer students, and increasing on-time degree completion are just a few of the factors that can have a positive impact on improving college cost-to-degree. A set of peer institutions have been identified by the Coordinating Commission for Postsecondary Education (CCPE) to include colleges/universities that have similar student characteristics, degree programs, and financial support. A gap between spending per degree has decreased between the State Colleges and comparable peer institutions for the second

consecutive year, from 30% in FY18 to just under 14% in FY20, as based upon the National Center for Educational Statistics. The benchmark for this metric was set at \$68,000 while also seeking to maintain this peer spending gap at approximately 25% through 2025.

- Increase of \$4,303 in Spending per Degree (1-Year Δ)
- Increase of \$12,754 in Spending per Degree (Baseline Δ)

PERU STATE COLLEGE

A Tradition of Fiscal Responsibility

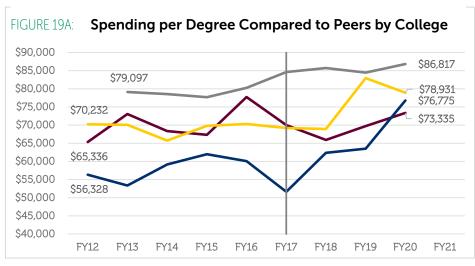

An affordable education ensures students across the State have access to quality education and strengthens opportunities for student success. For Nebraska families, cost remains a vital factor for new and transfer college students. For example, the careful fiscal management of Peru State College's services, ultimately providing more completed degrees for the dollars spent, maximizes the State's investment.

As a responsible steward of both student tuition dollars and taxpayer dollars from the State of Nebraska, Peru State College consistently leads its peers in reducing spending per degree. The College has been and continues to be creative in streamlining processes while finding opportunities to provide a meaningful and engaging education for students.

College Level Data

GOAL: Access and Affordability Nebraska State College System 51

Student Unmet Need per Resident Student FTE

INDICATOR 20

The amount of unmet student need for each year is based upon the Unmet Needs Report each State College completes and submits to the Coordinating Commission for Postsecondary Education (CCPE) and compared to the resident student FTE for that year. These numbers reflect the total amount of unmet need for students attending the NSCS. Over the past decade, this estimate of unmet need per resident student FTE has steadily grown, with an overall increase of 121% since AY12. The State Colleges reached a high of just over \$8.5 million in unmet need for students in AY22 and \$2,083 per FTE.

For students, the difference between the combined grant/aid offers and the cost of attendance is referred. to as Unmet Need. Traditionally an estimate of the Expected Family Contribution (EFC) is used in determining how much a family should be able to contribute to its student's educational costs. The EFC represents a measure of a family's financial strength (taxed and untaxed income, assets, benefits. etc.) and is calculated using a standard formula established by the U.S. Department of Education. As the overall Cost of Attendance (COA) which is the calculation of

all related educational expenses, including tuition, fees, room, board, textbooks and miscellaneous costs, has increased, families have an increasingly difficult time filling the growing gap between COA and the grant/aid available at their students' colleges. Programs like the Nebraska Opportunity Grant and College need-based scholarship programs serve a valuable role in helping to fill the growing gap in unmet need. However, increases in federal Pell awards have not kept pace with increases in the average COA. Yet, the percentage of Pelleligible students in the Nebraska

State College System has remained consistent at around 40% over the past several years. This benchmark was set at \$1,800 per resident student FTE to increase efforts by the Colleges and with the State to hold the line on unmet need for Nebraska students into 2025.

- Increase of \$346 in Student
 Unmet Need per Resident FTE
 (1-Year Δ)
- Increase of \$919 in Student
 Unmet Need per Resident FTE
 (Baseline Δ)

WAYNE STATE COLLEGE

Scholarships Help Meet Student Need

After establishing its first institutional Strategic Enrollment Plan, Wayne State College made renewable first-time freshmen scholarships a top priority to attract and retain students. To make the scholarship process user-friendly, the College developed a simple online application and process to evaluate applicants and determine specific award amounts based on common practices within higher education (ACT/GPA), which determines the specific amount awarded to each student. Wayne State uses institutional dollars and donor-supported foundation scholarships to fund the scholarship program. The effect on student enrollment and retention is annually assessed to ensure scholarships have the greatest positive impact on recruitment and the College's mission of providing an accessible and affordable 4-year education. The retention rate for full-time, first-time freshmen returning their sophomore year has averaged 10% higher for scholarship recipients during the past three years.

ENDNOTES

- 1 As defined by the National Center for Education Statistics (NCES) to represent "A measure of the rate at which students persist in their educational program at an institution, expressed as a percentage. For four-year institutions, this is the percentage of first-time bachelors (or equivalent) degreeseeking undergraduates from the previous fall who are again enrolled in the current fall."
- 2 The Consortium for Student Retention Data Exchange (CSRDE) is an association of two-year and four-year institutions with the common goal of achieving the highest possible levels of student success through collaboratively sharing data, knowledge and innovation. Additional information about the CSRDE can be found at http://csrde.ou.edu.
- 3 Six-year graduation rates for open access institutions was at 29.7% for the most recent cohort according to data provided with the IPEDS Analysis Dashboard (https://www.nscs.edu/for-nebraska/dashboards/ipeds-analysis).
- 4 Results from the National Association of Colleges and

- Employers (NACE) Internship and Co-op Survey found that approximately 68.3% of 2020-21 college interns received an offer for full-time positions as a result of the internship and 75.5% accepted those positions.
- These are annual data for each fiscal year, which includes fall, spring and trailing summer and represent an average based on workload reports prepared at each of the individual Colleges. The proposed 16:1 ratio represents a desired average for class size across the Nebraska State College System with recognition that instances will exist where smaller class sizes will be necessary to align with negotiated workload, and accreditation requirements. The inverse is also true, where large lecture sections will still be used to deliver course content when this method is warranted pedagogically.
- 6 During the 2018-19 academic year, College Presidents engaged with stakeholders and industry representatives across Nebraska to identify critical degree programs that are necessary for meeting workforce shortages. The areas identified include degree programs in Rangeland Management,

- Business Administration, Education, Industrial Technology, Computer Science, and Criminal Justice.
- 7 Using a conservative 2.5 multiplier to estimate the effect of one dollar in the economy that changes hands several times, the following is an estimate of that economic impact of the NSCS budget, mainly in rural Nebraska.
- 8 A conservative calculation of a per-student expenditure rate of \$75 per week along with the 2.5 multiplier and a conservative enrollment estimate also provides additional funds spent in the local area during the academic year.
- 9 These figures include federal loan programs such as Perkins and Stafford Subsidized and Unsubsidized
- 10 Along with its sister institutions, the State Colleges use the following CCPE Peer Institutions:
 - Black Hills State University,
 - · Concord University,
 - · Eastern Oregon University,
 - · Emporia State University,
 - · Fairmont State University.
 - Fairmont State Univers
 - · Minot State University,
 - · Northern State University,
 - · Northwest Missouri State University,
 - Northwestern Oklahoma State University,
 - Southwest Minnesota State University,

- Truman State University,
- · University of Wisconsin-River Falls,
- · Valley City State University,
- · West Liberty University, and
- Western State Colorado University.
- 11 Total cost to cover the average total net price for individual students is calculated by using IPEDS data for first-time degree/certificate seeking undergraduate students who graduated from high school in the past 12 months and are U.S. residents. Bureau of Labor Statistics data were used to determine CPI indicators for this metric.
- 12 Along with its sister institutions, the State Colleges use the following CCPE Peer Institutions:
 - Black Hills State University,
 - · Concord University,
 - · Eastern Oregon University,
 - Emporia State University,
 - · Fairmont State University,
 - · Minot State University,
 - · Northern State University,
 - · Northwest Missouri State University,
 - Northwestern Oklahoma State University.
 - · Southwest Minnesota State University,
 - Truman State University,
 - · University of Wisconsin-River Falls,
 - · Valley City State University,
 - · West Liberty University, and
 - Western State Colorado University.

APPENDIX 1: DATA SOURCES FOR PERFORMANCE INDICATORS

1: Student Retention Rates

IPFDS Retention Rates based on October 15th Snapshot Enrollment data, provided annually by College Institutional Research (IR) Lead in Strategic Planning Worksheet (Tab 1).

2: Pell-Eligible Student Retention Rates

IPEDS Retention Rates based on October 15th Snapshot Enrollment and Financial Aid data, provided annually by College IR Lead in Strategic Planning Worksheet (Tab 1).

3: Undergraduate Degree Completion Rates (6-Year)

IPEDS Graduation Rates based on October 15th Snapshot Graduation data, provided annually by College IR Lead in Strategic Planning Worksheet (Tab 1).

4: Pell-Eligible Undergraduate Degree Completion Rates (6-Year)

IPEDS Graduation Rates based on October 15th Snapshot Graduation and Financial Aid data, provided annually by College IR Lead in Strategic Planning Worksheet (Tab 1).

5: Total Degrees Awarded, Undergraduate/ Graduate

IPEDS Graduate Data based on Fiscal Year (leading Summer, Fall, Spring), provided annually by College IR Lead in Strategic Planning Worksheet (Tab 3).

6: Total Degrees Awarded, Transfer Students

IPEDS Graduate Data disaggregated by College

tracking of Transfer Students, based on Academic Year (Fall, Spring, trailing Summer), provided annually by College IR Lead in Strategic Planning Worksheet (Tab 4).

7: Students Completing Academic **Experiential Learning Activities**

College tracking of student enrollments for all academic courses that involve experiential learning activities, provided annually by College IR Lead in Strategic Planning Worksheet (Tab 5)

8: Capital Investment in Infrastructure that **Supports Student Learning**

Data are pulled from the Additions to Capital Assets. The NSCS column agrees to the Audit Report (FN#3 Capital Assets) Total Capital Assets – Additions column. The breakout by College is pulled from the summary worksheet used for the footnote.

9: Student to Faculty/Staff FTE Ratios

Student and Faculty FTE Data as reported annually by College IR Leads on the Instructional Load Report. Staff FTE as reported by System Office staff and includes Non-Union Professionals, NSCPA Professionals, Non-Union Support Staff and NAPE Support Staff.

10: Distribution of Instruction Delivered by Full-Time Faculty

Distribution percentages of instruction delivered by Full-Time Faculty vs. Others, with Full-Time Faculty defined as those holding rank of Professor, Associate Professor, Assistant Professor and Instructor Data as

reported annually by College IR Lead on the Instructional Load Report.

11: Overall Undergraduate Completer Placement in Nebraska

IPFDS Graduation Data which is then matched with Nebraska Department of Labor Data. requested annually by the NSCS.

12: Undergraduate Completer Placement in **Targeted Workforce Areas**

IPEDS Graduation Data for specific programs identified as targeted workforce areas, which is then matched with Nebraska Department of Labor Data, requested annually by the NSCS.

13: Overall Student Enrollment

IPEDS Enrollment Data based on October 15th Snapshot data, provided annually by College IR Lead in Fall Enrollment Report.

14: Enrollment Growth in Targeted **Workforce Programs**

Enrollment Data pulled from Quantitative Annual Reports (QARs) specific to programs aligned to targeted workforce areas, provided annually by College IR Lead. Disaggregation and computation of these data can be found in the Strategic Planning Workforce Program Data Worksheet.

15: Economic Multiplier for Region/State

A multiplier of 2.5 is applied to 1) the total budget for each College and the System Office (from preliminary distribution of Funds) and 2) an Estimate of Student Annual Expenditures in the Community multiplied by Student FTE.

These two amounts are totaled to arrive at the economic impact.

16: Percentage of Funding (General Fund vs. Net Tuition)

Overall percentage of the NSCS budget appropriated by the Legislature versus amount collected through tuition charges.

17: Median Undergraduate Debt at Completion

Data pulled annually from College Scorecard Raw Data Document. The specific fields are GRAD-DEBT-MDN (Column BEW) and GRAD-DEBT-N (Column BFK). Amounts include only federal loans. (https://collegescorecard.ed.gov/ data/)

18: Average Net Price Compared to Peers IPEDS Data provided in NSCS IPEDS Analysis Data Tool Dashboard, specific to measure "Cost & Aid: Average Net Price".

19: Spending Per Degree Compared to Peers IPEDS Data provided in NSCS IPEDS Analysis Data Tool Dashboard, specific to measure "Efficiency: Total Spending per Degree".

20: Student Unmet Need per Resident Student FTE

Data pulled annually from College Nebraska Opportunity Grant (NOG) Expenditures Report, submitted each year to the CCPE, as compared to Undergraduate Resident Student FTE data submitted each year in annual Enrollment Reports.

APPENDIX 2: **STRATEGIC PLAN SCORECARD UPDATE**

(YEAR 4)

	Figure 1: Fall-to-Fall Student Retention Rates 1-Year Δ Baseline Δ							
GOAL: Stu	dent Success and Completion		1 Icai A	baseline A				
INDICATOR 1:	Student Retention Rates		1.1%	2.2%				
INDICATOR 2:	Pell-Eligible Student Retention Rates		-3%	-3%				
INDICATOR 3:	Undergraduate Degree Completion Rates (6 Year)		0.6%	3.3%				
INDICATOR 4:	Pell-Eligible Undergraduate Degree Completion Rates (6 Year)	0% -	4% •				
INDICATOR 5:	Total Degrees Awarded, Undergraduate/Graduate		88 •	39 •				
INDICATOR 6:	Total Degrees Awarded, Transfer Students		-36	-41				
GOAL: Inst	itutional & Academic Quality							
INDICATOR 7:	Students Completing Academic Experiential Learning A	ctivities	76 •	35 •				
INDICATOR 8:	Capital Investment in Infrastructure that Supports Stude	\$2.9M •	-\$3.6M •					
INDICATOR 9:	Student to Faculty/Staff FTE Ratios	0.3%	-0.17%					
INDICATOR 10:	Distribution of Instruction Delivered by Full-Time Facult	0% •	-2.4%					
Workforce	and Economic Impact							
INDICATOR 11:	Overall Undergraduate Resident Completer Placement	in Nebraska	2% •	1% •				
INDICATOR 12:	Undergraduate Resident Completer Placement in Targe	eted	1.3%	0.9%				
	Workforce Areas							
INDICATOR 13:	Overall Student Enrollment		1% (81)	8% (660)				
INDICATOR 14:	Enrollment Growth in Targeted Workforce Programs		1.7% (71)	1.7% (77)				
INDICATOR 15:	Economic Multiplier for Region/State		\$29.3M •	\$72.3M •				
Access and	d Affordability							
INDICATOR 16:	Percentage of Funding (General Fund vs.	% General Fund:	1.5%	1.7%				
	Net Tuition)	% Tuition:	-1.5%	-1.7%				
INDICATOR 17:	Median Undergraduate Debt at Completion		-\$24	\$405				
INDICATOR 18:	Average Net Price Compared to Peers		\$517	\$1,404				
			3.7%	10.7%				
INDICATOR 19:	Spending Per Degree Compared to Peers		\$4,303	\$12,754				
			6%	20.1%				
INDICATOR 20:	Student Unmet Need per Resident Student FTE		\$346	\$919 •				

STRATEGIC PLAN TASK FORCE

CHADRON STATE COLLEGE

Ann Burk

Chief Information Officer

Dr. Mary Clai Jones

Assistant Professor in English

Kari Gaswick

Vice President for Administration & Finance

Aubrie Lawrence

Student Representative

Dr. Tracy Nobiling

Professor of Justice Studies

Joanne Owens-Nauslar

Community Member, Alumni

Dr. Jim Powell

Vice President Academic Affairs

Austin Stephens

Director of Housing & Residence Life

Dr. Wendy Waugh

Dean of Graduate Studies & School of Business. Mathematics

PERU STATE COLLEGE

Wavne Albury

Director of Athletics & Baseball Coach

Dr. Tim Borchers

Vice President for Academic Affairs

Dr. Jesse Dorman

Vice President for Enrollment Management & Student Affairs

Joyce Douglas

Vice Chair of the Foundation Board

Danny Haves

Faculty in College of Professional Studies

Samantha Hernandez

President of Student Senate

Dr. Paul Hinrichs

Dean of the School of Arts and Sciences

Crystal Hutson

Director of Student Activities & Programs

Dr. Judith Ruskamp

Professor of Education

WAYNE STATE COLLEGE

Leslie Bebee

Dr. Dave Bohnert

Dean of Arts and Humanities

John Dunning

Vice President for Information Technology

Dr. Steve Elliot

Vice President for Academic Affairs

Dr. Kristi Fox

Social Sciences Professor

Kevin Halle

Director of Admissions

Dr. Joni Irlmeier

Education and Counseling Associate Professor

Jessica Palmillas

Student Senate & Student Activities Board

NEBRASKA STATE COLLEGE SYSTEM

Dr. Paul Turman

Chancellor

Marjean Terrell

Trustee

Dr. Deborah Frison

Trustee

John Chaney

Trustee

Dr. Jodi Kupper

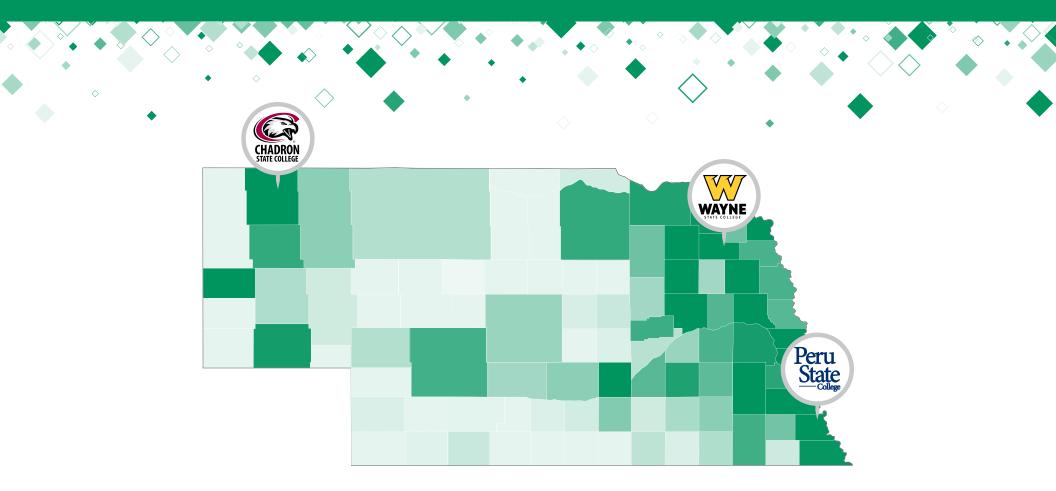

Vice Chancellor for Academic Planning & **Partnerships**

Judi Yorges

Director of Strategic Initiatives & Communications

Serving Students From **EVERY NEBRASKA COUNTY**
