

Nebraska State Colleges 2022 Fall Enrollment Report

The Fall Enrollment report is intended to provide an overall picture of student enrollment across the Nebraska State Colleges. The report is based upon data as of October 15th and is consistent with IPEDs submissions and definitions to the extent possible. This report reflects only Fall 2022 enrollments and does not capture unduplicated enrollments for spring and summer terms.

Overall Enrollment

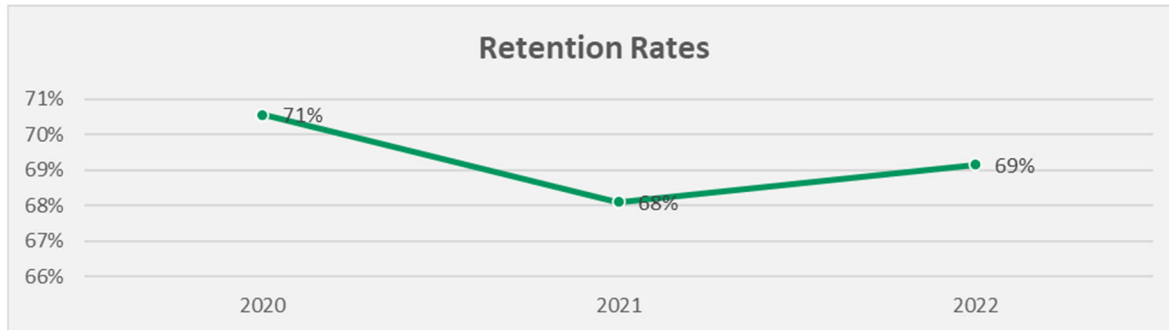

From 2021 to 2022, overall headcount increased by 1% and overall FTE has increased by 1.4%. CSC remained flat in overall headcount with small increases in undergraduate headcount offset by small decreases in graduate headcount.

CSC experienced an overall increase in FTE of 1.1% due to a 3.7% increase in graduate FTE. PSC saw an increase in undergraduate FTE of 1.9%; however, experienced declines in headcount of 3% in undergraduate and 24% in graduate students and declines in FTE for graduate students of 28%. WSC experienced an overall increase of 4.2% in headcount and 2.5% in FTE with a 12.2% increase in graduate headcount.

Retention

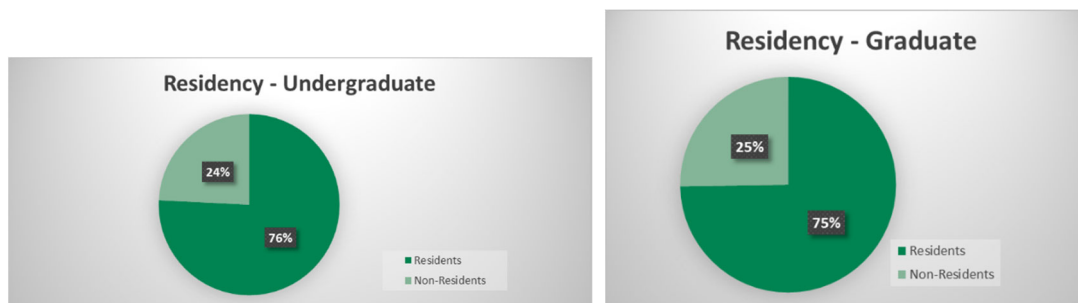

After experiencing a 3% decrease in retention from 2020 to 2021 to 68%, the system has experienced an increase of 1% from 2021 to 2022. CSC and PSC experienced increases of 4% and 3.5%, respectively and WSC remained flat at 72%. However, PSC saw a 5.5% decrease.

Residency

Residents are those students whose state of residence is listed as Nebraska. Non-Residents include any students whose state of residence is listed as any state other than Nebraska as well as all international students.

The overall percentage of resident students increased from 75% to 76% from 2021 to 2022. Of the total undergraduate students, the percentage of resident students remained at 76%. The percentage of graduate students who are residents increased by 2%, from approximately 73% in 2021 to 75% in 2022.

Professional Development

In July 2021, the Board approved a new tuition rate for professional development courses. Professional Development students are those students who are enrolled and receiving credit in a training, continuing education, and/or professional development activity offered by external organization or entity. CSC and PSC did not offer any professional development courses. WSC offered only graduate level professional development with a total headcount of 157.

This information will be incorporated into future fall enrollment reports in the total enrollment section in a similar fashion to dual credit.

Delivery

With respect to the delivery of courses, students may be duplicated if they are taking a course in more than one delivery type. The number of on-campus students includes those students who are taking at least one credit on campus. The number of online students includes those students who are taking at least one online course, regardless of other course enrollment, that requires the students to participate and interact with one another and with their instructors online.

The overall distribution of students taking courses on campus and online has continued to change. In 2021, 60% of students were taking at least one course on campus and 54% were taking at least one online course. In 2022, 57% of students were taking at least one course on campus and 57% were taking at least one online course. Approximately 85% of graduate students are taking at least one online course while a smaller but still significant percentage of undergraduate students (51%) take at least one online course.

System-wide Fall 2022 Enrollment
